# SAFE GUARDIAN EXEC. SUMMARY

**SafeGuardian** bridges the gap between disaster victims and rescue teams by combining AI-powered communication, real-time data collection, and geolocation services to streamline emergency response efforts. SafeGuardian is both a lifeline for trapped victims and a centralized dashboard for rescue teams, enabling efficient prioritization and coordination of resources during critical situations.

At its core, the app facilitates seamless information exchange, transforming user interactions into actionable data for rescue operations. It leverages advanced technologies to provide immediate support to victims while simultaneously building a comprehensive, real-time picture of the disaster scenario for emergency responders.

## PREPARED FOR :

Elizabeth A. Nerantzis  
Project Manager & Business  
Strategy Consultant  
OVERWATCH

# OUR TEAM

AI DISASTER ASSISTANT

## PAUL COHEN

Creative technologist and hands-on technology strategist who likes solving problems and delivering positive results. Full stack international business and technology experience across multiple domains. Always learning.

<https://sonicviz.com/us/>

## SERGIO SAENZ

Cybersecurity professional with 17 years of experience, primarily with the Department of Defense. Developed Continuation of Operations Plans, Information System Contingency Plans, and Disaster Recovery Plans for critical command & control systems

<https://www.linkedin.com/in/sasaenz/>

## ANDREW HERR

Geologist and environmental consultant specialized in OSINT, cybersecurity, remote sensing, earth observation, planetary science, environmental justice, and human rights. I'm a lifelong learner always looking to expand my skills.

<https://www.linkedin.com/in/andrew-herr2/>

## SINAN ROBILLARD

Innovative AI/NLP Research Engineer harnessing new technologies to drive positive impact. Experienced with earthquake prediction, social listening, unstructured data analysis, data visualizations, edge-optimizations

<https://www.linkedin.com/in/sinan-robillard/>

## OTTO WAGNER

Research engineer specializing in machine learning and generative AI. His strengths lie in realizing practical and useful implementations of complex algorithmic and mathematical ideas. His career spans a swath of scientific focus areas, including remote earth observation sciences.
